1. The following statements were made by a Soviet Air Force officer, at present under medical treatment in East Berlin:
2. In about 18 months it will no longer be possible for enemy airplanes to reach Soviet territory. A light jet interceptor is being brought into production which is like the MIG-15 in design and power plant, but is considerably lighter. The stern is of plastic material. The plane does not have complicated radar equipment, but will be guided by radio from a large airplane equipped with aircraft radar. Upon completion of a new engine works in Minsk (in which, the officer boasted, his wife is already employed) the USSR will be able to manufacture about 2,000 jet fighters per month. Present production is only about 700 MIG-15 jets.
